

To whom it may concern,

The world has enough problems in it, violence, crime, perversion of all sorts. We do NOT need the media lowering their standards once again to add more shmuck to our television sets. What happened to common decency, and family values. A parent can not turn on the television anymore without worrying what their child might see. . .what might be portrayed to them as normal. The fact is, vulgarity, nudity, and extreme violence are present to a fault in our society. Do NOT air full frontal nudity, the "F" word or "s" word on television. If this happens. I can guarantee that that is when my household, and many others that I know will be dropping television forever! Take a stand and have the courage to promote morals in society, instead of crap!
